Reading Geek Night Brief

Established ~2008.

A friendly and welcoming community for enthusiasts. There is a strong emphasis on social networking while listening to engaging talks and sharing ideas and laughs with a pub quiz.

Talk topics are completely flexible. If you want to share your geekery about an interest, hobby or passion and can talk for ~20mins we would love to hear from you. Past talks have included: Brewing beer, Art & Design, VR, Land Speed Record Team, AI/Machine Learning, Electric Light Technologies & Film Audi Postproduction.

We work closely with Science in Reading, British Computer Society (Berkshire Chapter) & The University of Reading STEM team. This helps us diversify the subjects covered and assists with community outreach. Our members actively support local schools and colleges with STEM related ad hoc talks.

Reading Geek Night Co-host, the bi-annual (Christmas & Summer) Reading STEAM Meetup Groups Gathering which provides a fantastic opportunity for Reading's Science, Technology, Engineering, Arts & Mathematics professionals, practitioners and enthusiasts to network and connect industry peers.

Our local events are 2nd Tuesday of the month. Usual format is to gather from 7.00pm with talks commencing at 7.30pm. Talks timings are completely flexible but generally 20mins + Q&A with a ~20mins break to encourage networking then we roundup the evening with a pub quiz.

Venue: Upstairs @ You can find us upstairs: [Zero Degrees](#) (9 Bridge St, Reading RG1 2LR) from 7pm.
