Science in Reading

Established 14+ years.

A friendly Science focused group entertaining the local community with the fascinating world of science - events from hands on workshops to engaging talks.

Originally part of the British Science Association (BSA Reading Branch) until decentralised and spun out to run autonomously within the regions.

Work closely with the British Computer Society (Berkshire Chapter), Café Scientifique, The University of Reading STEM team and several long-established community outreach groups: Google Developer Group, The IET, Reading Geek Night. This helps us diversify the subjects covered and assists with community outreach. Our members actively support local schools and colleges with STEM related ad hoc talks.

Science in Reading Co-host the bi-annual (Summer & Christmas) Reading STEAM Meetup Groups Gathering which provides a fantastic opportunity for Reading's Science, Technology, Engineering, Arts & Mathematics professionals, practitioners and enthusiasts to network and connect industry peers.

Our local events are 1st Tuesday of the month. Usual format is to gather from 7.00pm with talks commencing at 7.30pm. Talks timings are completely flexible but generally 40-60mins + Q&A with a ~20mins break to encourage social networking.

Venue: Upstairs @ You can find us upstairs: Zero Degrees (9 Bridge St, Reading RG1 2LR) from 7pm.
